Zenith
FIREARMS

Company Overview

The Zenith Firearms team.

Zenith Firearms and its sister company ZQI Ammunition, are subsidiaries of Zenith Quest Corporation (Zenith). Nearly 10 years ago the owners of Zenith began the importation and exportation of various products to and from the United States. Zenith's product line has included handmade rugs and crafts, stone tile, eyewear, food products, and cleaning agents from countries such as Turkey, Israel, and Australia. Leveraging on experience and knowledge of international trade, Zenith began to specialize in the development and advancement of business-to-business relationships around the globe.

In 2013, Zenith recognized the need for high-quality ammunition in the United States. Building on its long-standing business relationship with MKE (<http://www.mkek.gov.tr/en/default.aspx>), the respected and centuries-old weapons and munitions company in Turkey, Zenith secured a high-quality and reliable source for small arms ammunition. With the necessary licensing in place, Zenith entered into agreement with Walmart to introduce three different calibers of this ammunition to the U.S. market under the brand name ZQI Ammunition. Zenith then began exploring other products of interest to the U.S. market and, as the exclusive North American

representative of MKE, invested in developing additional MKE products to the specific needs and wants of Americans. The fruit of this investment has been the advent of Zenith Firearms and its high-quality versions of the roller-lock, delayed blowback firearms in use around the world. This relationship caught the attention of numerous other firearms companies which sought to partner with Zenith. To date Zenith has agreed to import and market for Girsan and Tisas, two high quality and well-known Turkish firearms manufacturers.

Zenith Quest and Zenith Firearms are family-owned companies that strive to procure and deliver the highest-quality products to their customers. Headquartered in Central Virginia, where the owners reside, an upcoming warehouse will allow for inventory storage and light manufacturing to further develop important business partnerships.
